1 Introduction

Intro to Proxies blah blah blah ...

Proxies use Apache TrafficServer (ATS) to blah blah blah ...

The proxies should be assessed for OS memory consumption, CPU use, disk space utilization, networking usage, and the performance of ATS.

2 Networking Usage

Networking blah blah blah ...

3 CPU Utalization

CPU blah blah blah ...

4 Memory Consumption

Memory use blah blah blah ...

5 Application Performance

(ATS) blah blah blah ...

6 Conclusion

End end end blah blah blah ...
